DETAILED ACTION

1. Applicant's election without traverse of group I claims 1-20 in the reply filed on 12/21/2007 is acknowledged.

Claims 1-20 are pending in this Office Action.

Remark

2. Claim 15 is a computer program....for performing the steps of any of the claims 1-14... In this case, Examiner interprets claim 15 is a computer program for performing the steps of claim 9 (displaying the processed textual information on a graphical format...two terms).

3. Similarly, claim 16 is computer readable mediumfor perform the steps of any of claim 1-14. Examiner interprets claim 16 is computer readable mediumfor perform the steps of claim 9 (displaying the processed textual information on a graphical format...two terms).

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 17-20 are drawn to generating a concept vector for each document classified in class 707, subclass 5.
 - II. Claims 15-16 are drawn to displaying textual information on a graphical format, classified in class 715 subclass 700.

5. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, authorization access in invention I generating a concept vector for each document can be used to classify the contents of the document on a relatively compact format. Displaying textual information on a graphical format in invention II can be used in visualizing the strength in the conceptual relationship between at least two terms. See MPEP § 806.05(d).

6. The inventions are distinct, each from the other because of the following reasons:

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2162

8. A telephone call was made to Attorney Edward A. Pennington on 3/7/2008 to request an oral election to the above restriction requirement, but there was no answer to Examiner's call and did not result in an election being made.
9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
